At this point, institutional repositories are:

Responses

CHSCONF

Disparate tapestries

Decreasing the need for ILL of articles

Discoverability an issue

Draws attention to author rights

Promising but needs improvement

For publishers a double edged sword

Not well indexed

Useful for digitizing historical content

Promising but needs improvement

Oversold

Run by only one person

Competition for preprint archives

Stepping stone

About to be taken over by Research management systems

A beast that needs to be fed

Difficult to gain buy-in esp from faculty

Not yet part of my work

For authors a lot of trouble sometimes

Not easily discoverable enough

Useful but not as interlinked as they could be

A good start, but not enough. Problematic with tenure and promotion.

Lacking good metadata

Not sufficiently integrated into research workflows

Future of Academic Libraries

Conduit for global research community

Not well known by many users

Challenging to sustain

Small in the Overall Scheme

The future

Underwhelmingly popular

Confusing to those outside the institution

Not discoverable

Difficult to build and maintain

A stopgap

Trying to find their place

Fabulous publishing platforms for gray lit

Complicated

Not part of my work at community college library

great way to get people to read my publications

Unfocused

Hard to build and maintain

in infancy stages

Popular with administration

Underutilized

Not something my library can afford to do

Essential
Responses
Institutional publishing platforms
Stagnant
fragmented
Uncoordinated
Only a stopgap
Pretty standard
Bloated
Cute
An unrecognized success story
Standard features
Nacent
In what ways will libraries add "value" in the near future?

Responses

- working towards equity of access
- Leader in campus scholarly communication
- Computational thinking
- Supporting digital scholarship
- Community
- Scholarly support
- Paywalled not jaywalked. Blasted autocorrect!
- Information literacy
- Advocate
- Academic support
- Communicate more with Our clients & Stakeholders
- Building Data Repositories and Data Collections
- Serving as information consultants
- TDM and Non‑consumptive research
- Spearheading access to cheaper alternatives to traditional textbooks
- Assessment
- Unique expertise and valued skill sets
- Comfort and support
- Making DDA happen for all jaywalked content, not just books and films
- By providing access to knowledge services not just things
- Data curation
- Radical innovation and collaboration. Bringing disparate units on campus together.
- Collaboration with multiple depts across campus
- Better baking tips
- Help users find OA items
- Making connections with students
- Improving discovery to delivery UX.
- Network node
- Information consultants
- In‑depth research consultation / subject expertise
- Continued, but as a third space
- Integrating and embedding
- Educate authors not to give away their copyright.
- Connections
- how to formulate searches
- Nice dogs
- Teaching students about searching and cynicism
- Evaluation of sources/ information
- Preservation
- Information literacy
- Research data curation
- Baked goods 😢
- Publishing
