Kibera, Nairobi
...was a blank spot on the map
Map Kibera: 13 young people put Kibera “on the map”.
water points
public latrines
medical clinics
schools
churches
mosques
video shops
shops
hair salons
community
organizations
vegetable
gardens
movie halls
bars
streetlights
Tracking community information: Education
Schools Data Collected:

- Number of Students (Male, Female)
- Number of Teachers (Male, Female)
- Toilet access (Male, Female)
- School Cost
- Feeding Program
- Sports Program
- School Head contact information
- Number of classrooms
- Building materials
- Sanitary Towel Program
- ...and more
Launch of OpenSchoolsKenya

The most basic school information -- like school location, fees, class size, or building types -- is unavailable, inaccessible, or out of date. This is especially true in many informal urban settlements, like the Kibera slum in Nairobi, Kenya, where demand for better education data is already well-established. That's where Open Schools Kenya comes in.

Tracking community information: health
Tracking community information: Water
Tracking community information: Water system of taps rather than tanks like in Kibera. High demand for water, but piped system is not formally available. Price of water at each tap is part of fire safety community planning process with red cross.
Citizen data accuracy verified by the community itself.
