And the Journey Continues...

Engage in extended learning and application of the Continuous Improvement philosophy. Learn basic elements of the philosophy, improvement tools and their uses, systems thinking, and other topics identified as essential. Continuous Improvement knowledge and skills. As an embedded part of the Institute, participants will apply their learning by developing and carrying out a PDSA cycle to improve a system of their choosing.

The institute will include whole-group meetings and small-group, facilitated cohorts. The cohorts will meet monthly after school and be led by staff experienced at applying continuous improvement tools and processes.

Don't be left out... take the plunge and join us for this collaborative learning opportunity by registering in Eduphoria Workshop! Invite your colleagues and form a team to learn together!
