</tbody>
</table>

#### Step 1: Planning

1.1 Identify routines and/or activities to target selected behavior

1.2 Determine naturally occurring reinforcers during routines/activities

1.3 Collect baseline data during identified routines and/or activities

1.4 Select EBP(s)

1.5 Develop implementation plan

1.6 Train staff/providers/family members to implement NI

#### Step 2: Using

2.1 Arrange environment to elicit target behavior

2.2 Engage the learner

2.3 Use selected EBP(s) and planned strategies with the learner

2.4 Provide naturally occurring reinforcement as appropriate

#### Step 3: Monitoring

3.1 Collect and analyze data on target behavior

3.2 Determine next steps based on learner’s progress

---

### Before you start:

**Have you…**

- □ Identified the behavior?
- □ Collected baseline data through direct observation?
- □ Established a goal or outcome that clearly states when the behavior will occur, what the target skill is, and how the team will know when the skill is mastered.

*If the answer to any of these is “no”, refer to the “Selecting EBPs” section on the website.*
