As schools seek to become Future Ready, it is necessary to identify and cultivate leadership beyond district and building leaders. School librarians lead, teach, and support their school’s and/or district’s Future Ready Schools (FRS) goals through their professional practice, programs, and spaces. Derived from the FRS framework, these principles both describe how librarians can support schools in this transition and identify specific ways in which librarians can themselves become more Future Ready. By aligning with strategic initiatives like FRS, librarians can better connect their practices, programs, and spaces to educational innovation in schools. If properly prepared and supported, school librarians are well-positioned to be at the leading edge of the digital transformation of learning.

Acknowledging that the current state of school libraries and librarians ranges widely from state to state and even from school to school, these principles are predicated on a core belief that in a Future Ready school, all students have equitable access to qualified librarians, digital tools, resources, and books. In support of these goals, partnerships and support of public librarians and libraries are welcome and encouraged.
Future Ready Isn't New........
