   Preserving in Digital Formats: Challenges and Solutions in Small Archives (30 min with time for questions and discussion with the group)

From digital AV to digitized photographs, lone arrangers are finding themselves more and more involved with issues of digital preservation. Like larger institutions, small ones are facing the same needs and challenges, but with micro-sized budgets and staff, how do we tackle these issues effectively? Join in the discussion of challenges and solutions to the issue of digital preservation—changing access, increasing visibility, and keeping it all preserved for the future.
