Choose a particular course, class, or tutoring situation that comes to mind as you think about word lists for vocabulary teaching. Now use it to briefly answer the three following questions:

1) Have you ever used word lists to teach vocabulary? If so, which ones? In what ways? If not how would you like to?

2) If you’ve used words lists, what were some advantages or disadvantages in doing so? If not, can you imagine some?

3) What questions do you have about using word lists? Suggestions or ideas for doing so?

Now discuss one or two points briefly with another person.
