words + timings = control
To use the Hyperaudio Pad, you first have to select some media, you do this by clicking on the icon here in the top left corner. Click. And choosing some media, I can see your media here, which is my media, because I'm logged on. You might not see that.

I'll just choose this, now you can navigate the content just by clicking on the words.

And now you can start building up your own remix by highlighting the bit you're interested in and dragging that over to the right hand side.
