Join Dr. Susan McMillan, Distinguished Nurse Researcher Award winner, for a comprehensive presentation on the results of symptom assessment and management studies over the past two decades. She’ll illustrate the progress made in managing pain and other symptoms in patients with cancer, focusing on the symptoms that are the most prevalent, intense, and distressing. McMillan will also review quality-of-life data from persons with cancer and their family caregivers, explaining how it relates to the success of oncology nursing symptom management.

**Coordinator/Speaker:**
Susan C. McMillan, PhD, ARNP, FAAN
Lyall and Beatrice Thompson Professor of Oncology Quality of Life Nursing
University of South Florida
Tampa, FL

**Full Disclosure:**
Nothing to Disclose

**Objectives:**
At the end of this session, participants will be able to:
1. Describe the progress oncology nursing has made in improving cancer symptom outcomes.
2. Discuss the impact of oncology nurses on patient and caregiver quality of life.
