Join us for a four-part session covering nursing research work in cancer care.

- Eileen Hacker, PhD, APN, AOCN®, will present “Persistent Fatigue in Stem Cell Transplant Survivors: A Biobehavioral Perspective.”
- Susan Mazanec, PHD, RN, AOCN®, will present “Activation for Health Management in Patients With Colorectal Cancer and Their Family Caregivers.”
- Ariesta Milanti, BSc, RN, will present “Psychoeducational Intervention to Reduce Psychological Distress in Breast Cancer and Cervical Cancer Patients Undergoing Chemotherapy.”
- Dalete Mota, PhD, will present “Comparison of Chamomile and Brassica Oleracea Extract in Preventing Radiodermatitis in Women With Breast Cancer: A Clinical Trial.”

**Target Audience:** Advanced Practice Nurses  
**Level of Content:** Advanced  
**Speaker:**  
Eileen Hacker, PhD, APN, AOCN®  
Clinical Associate Professor  
University of Illinois at Chicago  
Chicago, IL  
**Full Disclosure:**  
Nothing to Disclose

**Objectives:**  
At the end of this session, participants will be able to:  
1. Describe symptoms accompanying persistent fatigue among people who have undergone hematopoietic stem cell transplant.  
2. Identify symptoms associated with patient confidence in health management among individuals surviving colorectal cancer.  
3. Recognize interventions that that lower psychological distress and reduce the occurrence of radiodermatitis among women undergoing breast cancer adjuvant therapy.
