Join us in a five-part session to grasp the concept of using qualitative data to inform nursing interventions.

- Catherine Finlayson, MS, RN, OCN®, will present “Awareness of Disease Status in Cancer Patients: A Concept Analysis.”
- Yumiko Kinoshita, ME, RN, will present “Health-Related Quality of Life in Patients With Lower Rectal Cancer After Sphincter-Saving Surgery: A Prospective Six-Month Follow-Up Study.”
- Rebecca Moreno, RN, BA, MSN, will present “A Qualitative Study Exploring What Bedside Nurses Need to Facilitate Advance Care Planning.”
- Deborah Selm-Orr, BSN, MS, DNP, AOCN®, will present “The Impact of Model of Care on Chemotherapy-Induced Nausea and Vomiting.”
- Karley Trautman, DNP, RN, ANP-BC, will present “Decreasing Adverse Effects of Immunosuppression Therapy in Patients With Acute Graft-Versus-Host Disease by Standardizing Practice: A Quality Improvement Project.”

Target Audience: All Levels

Level of Content: Intermediate

Speaker: Catherine Finlayson, MS, RN, OCN®
Clinical Nurse III
Memorial Sloan Kettering
New York, NY
