Survivorship Care Planning: One Size Does Not Fit All

This session has been developed in collaboration with the Survivorship, Quality of Life, and Rehabilitation Special Interest Group.

Gain knowledge about the operationalization of survivorship care plans across diverse survivorship models. You’ll hear from three panelists, each providing her unique perspective on care plan implementation and overcoming barriers to developing or delivering survivorship care plans. You’ll also have the chance to participate in a group discussion with the panelists and other attendees to share your own insight.

Target Audience: Primary Care Physicians, Registered Nurses

Level of Content: Intermediate

Objectives:
At the end of this session, participants will be able to:
1. Describe three examples of survivorship care plan implementation.
2. Identify at least one technique for survivorship care plan implementation that would be helpful in your own setting.
3. Discuss at least one strategy for overcoming a common barrier to developing or delivering survivorship care plans.
