CBISA™ and the Campus Compact Civic Action Plan
CBISA: Collecting and Tracking the Data
CBISA™, technically speaking...

CBISA™ is a web-hosted software program.

It can be used with most popular web browser and requires minimal IT involvement.

We host the program for you, provide 128 bit encryption and nightly backups with a 7 day retention, to ensure your data is secure.

Access is controlled on a “need-to-know” basis. There are 10 different permission levels available to control access.
Accessible anywhere there is an internet connection

24 hours a day, 7 days a week
Entering the Action Statement Details

CBISA is pre-populated with the five promises of the Action Statement.

AND enables you to list the internal assets that will be dedicated to meeting the promise along with information about the anticipated impact!
Add your Partners and indicate the asset(s) they may provide
Deciding What to Measure

In CBISA’s Indicator Builder default, you’ll find over 50 pre-defined indicators to help you measure your success toward fulfilling your promise…
Or create an unlimited number of your own indicators!
After you’ve decided what to measure, add the appropriate indicator records, set your baseline and target measurements...then begin to record your actual counts.
As you meet expectations regarding the promises made in the Action Statement, record the impact you’ve had in the Outcomes module.
Enter Goals for each of the Action Statement commitments
Add an unlimited number of Programs (Service Learning, Internships, Donations, Volunteer Projects, etc.) and track the resources dedicated to the Programs on the Occurrence form.
Tell the “rest of the story,” keep track of meeting minutes, etc. in the Narratives module.

* Be sure to obtain necessary clearances before entering any private information and to cite sources for quotations.

My first day of service ended a few hours ago and words failed to describe my feelings or the thoughts that broke into my mind as I painted every wall and made a difference in the life of a single mother who lacks a home. I felt like I was given an opportunity to understand what service truly is. Service has no definition, it can be helping a friend through homework, it can be taking your grandma to the doctor, it can be building a home, or playing with a child. I may not always see the impact of the service I do but it affected me in the strongest way...it made me think...it made me become more of a human. I was no longer thinking about our dinner today or our drive through traffic, I was thinking of how my work will impact those single women at Light House Path.
CBISA: Reporting Your Progress and Impact
Reports showing all elements associated with each initiative demonstrate the full extent of your efforts.
See How You Are Improving

See your progress through Goals Achieved and Indicator Measurements!

Creating a Great Campus Civic Action Plan

In signing the Campus Compact 30th Anniversary Action Statement, presidents and chancellors make a public commitment both to its principles and to developing a plan to put those principles into action. The following framework provides a shared foundation for Campus Compact members to approach Civic Action Plan (CAP) development while encouraging creativity, flexibility, and boldness.

More than just a software company...
