Enrica is an Italian interaction designer, digital artist and Fulbright scholar fascinated by the interaction between humans and new technologies, individual and collectivity. Her projects are all about complexity, emotions and behaviors. She has fierce intellectual curiosity and an absurd sense of humor.

Enrica holds an M.F.A. in Design and Technology from Parsons, an M.F.A in Systems Design and a B.F.A in Industrial design from ISIA Roma Design. Her works have been included in the exhibition and book "ISIA Design Convivio" (Expo Milan 2015).
