Going gradeless will transform a classroom, benefiting student learning and growth. Setting up the classroom to promote this mind-shift in practice is key to having success.

What is my main objective for going gradeless? *(The why)*

How am I going to communicate learning to students, parents, and administration?

How will students record their self-reflections, self-evaluations, and evidence?

How am I going to address the concerns of parents?

What are my immediate next steps?
