These murals depict a famous Taos landscape or landmark in a way that highlights the need for Taos County politics and residents to address illegal dumping and careless littering. Students harvested trash from across Taos neighborhoods to create their murals with a combination of the following items: recyclable glass, fast food packaging, ceramics, plastics, aluminum cans, styrofoam, etc. The murals also contain natural items like pine needles, stones, and bark to contrast how trash is so prevalent in our communities that it distorts our appreciation of natural beauty and our sacred spaces. The murals created are originally 36” x 42”.

Art & Activism Landscapes of Taos
