### Name your learning space.

Is this a space that currently exists, or has it not yet been built? Is it virtual or physical?

### Establish parameters.

What does equitable education look like in 40 years?

How is it different socially, politically, and economically from today?

In your group, discuss the insights you all bring to the table around these issues.

*Remember to suspend disbelief!*

### Identify core values.

Based on your discussion and creation, what core values have emerged that are needed to make your future a reality?

Identify at least one value/person. Look for themes.

### Bring it all together.

What is the story you want to tell about your future space, characters, and work?

What do you see and who is present?

What are they speaking about, waiting for, or excited about?
