NEIL SMITH
“Our Jenkins pipeline reacts to Freshmaker’s messages on the UMB, and our first indication that we’re affected by a CVE is that “everything is already done”, rather than the old notification from our program manager.”

Gerard Ryan
Engineer, RHMAP

“The Factory 2.0 team has been essential to the RHEL program: implementing core infrastructure, ensuring we have consistency in our pipeline, and constantly churning out new RFEs.”

Josh Boyer
Architect, RHEL

“For CVP, Greenwave provides a necessary persistence mechanism to combine the output of test runs. It is used to determine and convey overall success to later components in the factory”

Dan McPherson
Wizard, Container Factory
MEASUREMENTS
