Every Midland child deserves a great school – in their neighborhood – that meets their individual needs and maximizes their potential.

Midland on the Move is our bold, student-centered transformation plan to make this a reality.
Partnership Preferences

• Seeking partners inside the district as well as outside to design new and reimagine existing in-district schools, programs, and to identify new and existing talent to support our most at-need students.

• Establishing and nurturing new in-district partnerships to cultivate, augment, and recruit the best leadership and talent to serve Midland’s kids.
Mission: All students will graduate prepared and ready for college or career.

2017-2018 CFQS Results

MISD is applying for SB 1882 funding and to TEA grants (including the Transformation Zone implementation grant) to support these partnerships.
Guiding Principles for Partnership

**QUALITY**

All partners must be committed to serving students and families as best as possible.

All partners will be measured against and held to the same high standards as any traditional MISD school.

**EQUITY**

*All means all:* partners must focus on meeting the needs of all students, particularly Midland’s most at need populations.

All partners must receive the same access to funding and resources to ensure all schools have the opportunity to achieve success for its students.

**COLLABORATION**

All partners must commit to collaborating with MISD to provide high quality options for all of Midland’s kids.

MISD in turn will commit to supporting partners as best as possible in building great schools.

*Mission: All students will graduate prepared and ready for college or career.*
