Main Discussion Topic:
What skills are developmentally appropriate at various ages, based on experience?

Secondary Discussion Topics:
How can general skills (Grit, Lateral Thinking, Critical Thinking, Design, etc) be specifically targeted for development within a student's practice of Fab Lab skills?
Secondary Discussion Topics (continued):

What skills did Fab Academy assume the adult students had, which would specifically need taught to younger students? Also, when are these age appropriate?

How do we best communicate this to all stakeholders? Any great web developers?

Open Space for Other Notes:

Thank you for attending this Working Group session and joining the discussion! --Corey
