Pratham believes that every child should be in school and learning well
More than 96% of children in the age group 6-14 are enrolled in school in India. More and more children are getting more and more years of schooling. But ..........

Close to 50% of children in Grade. 5 in rural India cannot read a Grade 2 level “story”.

Similar proportion of children even in Grade 5 have difficulty in correctly solving a basic subtraction problem.

In most states in India, children are expected to do this kind of math by Grade 2.

ASER stands for Annual Status of Education Report. Facilitated by Pratham, a nationally representative sample of children are assessed each year on basic reading and arithmetic.
1. Simple one-on-one assessment done to group Grade 3, 4 and 5 children by level rather than by grade.

2. Children’s groups are made according to the basic assessment. Available teachers or instructors allocated to facilitate group activities and to guide children’s work.

3. For each group there are a set of activities and materials appropriate for their level.

4. Similar assessment used for tracking children’s progress, monitoring intervention.

Children learn in groups and also individually. Teachers or instructors do activities with groups.

As children make progress they move into the next group.
Learning Camps for Grades 3-5: 2016-17

- Pratham worked directly in 5973 units in govt primary schools across India impacting close to ~ 200,000 students in Grades 3-5.

- Baseline 52% children could not even read simple words.

- 30-40 days later. At end line 81% could read simple text fluently.

How much does learning improve in Learning Camps?
In the 2016-17 school year in India

- Pratham’s direct work – Learning Camps impacted 200,000 children.
- Pratham’s work in partnership with governments indirectly impacted close to 4.5 million children in India.

HOW MUCH DOES IT COST?

JPAL, Pratham & other partners are doing TaRL in Zambia. More countries are interested.

Pratham’s Learning Camps in India cost approximately $15 per child.

When working in partnership with the government the cost is much lower... $2-4 per child depending on the program.
