Recent Publications

[SAC097]: SSAC Advisory Regarding the Centralized Zone Data Service (CZDS) and Registry Operator Monthly Activity Reports (14 June 2017)

- The stated CZDS program goals were standardization and easy, reliable operations for participants who have a requirement to access these zone files.
- The CZDS has often succeeded in these goals. However, after three years of operation, community members have documented problems where the CZDS does not deliver on these objectives.
- This advisory details these problems and recommends improvements.

[SAC098]: The Security, Stability, and Resiliency of the DNS Review (SSR2) (04 October 2017)

- SSAC letter to the ICANN Board of Directors concerning the status of the SSR2.
Questions from the Community

- How does the SSAC prioritize new work?
- How does the SSAC address requests from the ICANN Board and the community?
- How does the SSAC track the Board’s response to SSAC advice?
- How does the SSAC inform the community of its work?
- How can the community track the Board's response to SSAC advice?
- How does the SSAC admit new members?
- What opportunities exist to collaborate and/or participate in SSAC activities?
Questions to the Community

- Are the SSAC publications accessible and understandable:
  - How is the length (long, short, just right?)
  - How is the level of detail?
  - Do the publications reach their audience?
- How can the SSAC do a better job for the community?
- What can the SSAC do differently?
- What topics would you like SSAC to consider as a work item?
Thank you
