My Story Book

My First Storybook

$5 to print
ABCya! Story Maker is a fun and easy way for children to create and print short stories. An intuitive interface makes it simple for kids to add words, pictures and pages. Students can print or save their stories with just a few clicks! Special thanks to the teachers and students at NCS in New Jersey for helping out.
My Storymaker
My Story Maker allows users to create a story entirely online. The user can choose characters and the character's goal for the story. The settings and other items for the story are added to the picture by simply clicking on them. The author can also choose emotions, actions and interactions for the characters, which the characters then act out in the picture. As the characters do this, the text of their actions appears below them. This text can be edited and the final story can be printed.

http://www.carnegielibrary.org/kids/storymaker/
Welcome to my StoryMaker

By clicking to begin, the player agrees to permit the Carnegie Libraries of Pittsburgh to display content created by the player for library promotional use.

My StoryMaker was made possible through a generous grant from the Grable Foundation.
Books to Create and Post Online

**Storybird** provides you with illustrations to inspire you to write and publish your own book. You choose the illustrations from many artists that are available. Choosing, rather than drawing the illustrations, forces the student to focus on making a story out of the illustrations, rather than on the illustrations themselves. Teachers can set up student accounts. Finished stories can be embedded into a blog. For a fee, they may also be downloaded or purchased in hard or softcover form.

[Example of a Storybird embedded into a blog here.](#)
Little Bird tales

**Capturing the Voice of Childhood**

Capture your child’s voice and imagination with our creative story building tool and share them with friends and family.

TypeTastic - redpanda
ABCYA.com Type Rocket

**Typing Rocket Junior**

Typing Rocket Junior is a fun keyboarding game for early elementary students. Kids have 3 minutes to type the letters on the rockets. The score is calculated by hits minus misses. Keyboarding practice has never been so fun!

Recommended for Grades: K, 1, 2
Dance Mat Typing

Dance Mat Typing – Best Typing Training For Students

DANCE MAT TYPING

REMEMBER...
- USE BOTH HANDS
- SIT UP STRAIGHT
- DON'T SKIP AHEAD!

Do you have kids or students who want to learn how to type? Dance Mat Typing by the BBC is a good choice. It is interactive, fun, free and easy-to-use for kids, the system is complete with animated animal characters, graphics and sounds. We provide friendly menus or kids and other cool stuff to make it easier for you and your kids to use Dance Mat Typing to effectively learn how to type.

Dance Mat Typing is structured as a series of four levels with three stages for each level (you can find them in the menu above). The animated animal teachers take kids through each of the 12 stages, narrating and showing them where to place their fingers on the keyboard, which fingers to use to type particular keys with onscreen cartoon hands. At the end of each stage, there is always a song by the teacher and his or her supporting cast to celebrate the kids' accomplishments.

- Dance Mat Typing will help your kids learn to type – or if they can type already, it'll help them get better and better.
- No signing up or logging in, the clear instructions and simple interface may very well allow kids to use it without adult assistance.
- 100% Free

“Dance Mat is great fun! It shows us how to type using the correct fingers. We have been using it each week. Here are some pics.”
Games
ABCya.com is the leader in free educational kids computer games and activities for elementary students to learn on the web. All children's educational computer activities were created or approved by certified school teachers. All educational games are free and are modeled from primary grade lessons and enhanced to provide an interactive way for children to learn.

Grade level lessons incorporate areas such as math and language arts while introducing basic computer skills. Many of the kindergarten and first grade activities are equipped with sound to enhance understanding. Fun children’s Holiday activities are available in grade level sections!
Bingo Baker - Make Bingo Cards

Bingo Baker makes it easy to create bingo cards. You can generate hundreds of random cards and print them using the printer-friendly PDF (with no ads or watermarks). You can also save paper (and waste electricity instead) by playing your bingo game online (it works on the iPad).

Too lazy to make your own cards? You can find a bingo card about nearly anything.

Instructions: Just type your words into the grid on the left. You can give your game a title and change the BINGO column headings too.

Then click the Generate button.

Drag images from your computer into a cell. Use `ALT + DEL` to delete an image from a cell.

Examples
- Weather Bingo
- Greek Alphabetic Bingo
- Addition Bingo
- Traditional Number Bingo

Signup Genius

Group organizing made easy.

1. Build a sign up form
2. Invite your group
3. People sign up online
4. We send reminders

I am overwhelmed with how incredibly nifty SignupGenius.com is! THANK YOU! What a relief from exploding ‘reply all’ inboxes...

Kim Bishop - Washington

Collect Payments on Your Sign-Up!
Hi there!
I'm a teacher in the Netherlands and I wanted to use a simple tool with all my favorite digiboard widgets to help my students focus more on their work. I could not find such a thing, so I decided to make it myself. And here it is!

Laurens Koppers
Developer

E-mail
Laurens@ClassroomScreen.com

Facebook
Vind ik leuk 338
Delen

Twitter
Follow @ClassroomScreen 1,213 followers
Tweet

How it works
Project this in your classroom on your digiboard.

You can:
- choose a background
type your instructions in the textbox
choose a work symbol
set a timer or show the clock
use the traffic light
pick a random name
do some simple math
draw in-screen or full-screen
generate a qr-code
drag and drop the icons in the right place

It is not possible to save your screen. But it is designed that it should not take more than 30 seconds to put up the screen (exact text).

Tips & Tricks

Duo widget: Does your class work in two groups on a different assignment? Use the duo widget option in combination with the drawing tool.
watch video

Image in textbox: If you want to show an image you can simply copy an image from Google (for example) and paste it in the textbox.
watch video

Save random name widget: You can save the names you use for the random name widget in a local file (such as Office Word or Google Docs). The next time you want to use the widget, grab your file and copy-paste the names in the widget.

Traffic light: You can use the traffic light as a visual reminder for voice level or to indicate if the student can disturb the teacher or not. Students can use it on their own devices to indicate their progress on a project or their understanding of a concept.

Go full screen: ClassroomScreen works even better in fullscreen mode. Use the button at the bottom of the screen (on the right). For Safari users, you can use the green button at the top.

iPad web app: Tap the Share button. This is the button immediately to the right of the address bar. You should see “Add to Home Screen” in the second row of buttons. Now you have a ClassroomScreen webapp.
