iPads in the Classroom
From Consumption and Curation to Creation

By Tom Daccord and Justin Reich
Educators shouldn’t think of iPads as repositories of apps but rather as portable media creation devices."
1. PUSH to Photos App
2. PULL from Photos App

Open Book Creator and pull Tellagami movie from Photos.

Take picture with Camera App. (Push to Photos)

App Smashing
Book Creator Challenges
Step 1: Set Up
- Start a new Page and continue to next step
- Add a new Page and continue to next step
- Change text color, font, and size
- Type “My Learning with iPads” on the Cover
- Select Landscape orientation
- Start a new Book

Book Creator Challenge
Add content to your book with the + icon.

Share photos, videos, and audio from other apps to Book Creator.

Projects.
Step 2:

- With your Camera app, take a few pictures of the room.
- Take a screenshot of your iPad Home Screen.
- Insert both pictures on your Cover.
- Resize and rearrange them.
- Delete one of the pictures.
Step 3:

- Search for an image of Boston seaport and save the image to your iPad.
- Insert the saved image on a new Book Creator page.
- Use the Draw tool and create a diagram that depicts the relationship between iPads and students. (Try your best!)
- Insert your saved image on a new Book Creator page.
- Insert the image to your iPad.
- Record your voice describing your image.
Step 4:

- Shoot a 20-30 second video with your Camera App.

- Insert the video into a new Book Creator page.

- If you have existing video on your iPad, insert one your videos.

- Resize, reposition.

- Now, delete the second video.
Collaborative Global Book

Create a Global book! #Ipaded
Create a page about your location & send 2 me. I want 2
Are u using Book Creator app? I would love it if u would

Paper53 Challenge
Sharing Book Creator Files
1. AirDrop Challenge

Access AirDrop from your Control Panel and set it to "Everyone."

With a partner, drop a Book Creator file.
Access from Control Panel

Bluetooth must be turned ON
2. Uploading & Merging eBooks with Book Creator

Open in Book Creator or iBooks to View

Upload eBook File to Google Drive
Create content & import into Book Creator from Camera Roll.

Export & Upload the Book to Google Drive.

Share the file.

Recipient can use "open in" to download to Book Creator to edit or iBooks to view.
Publishing with Google Drive

Process:
1. Students upload ePub file to a shared / class folder
2. Teacher modifies sharing settings of folder to "Anyone with the link & can view" and "can view"
3. Copy the URL to the public folder
   ● Post the link on a class website
   ● Shorten the link & share

Publishing with Google Drive
What if students created...

- Book trailers for reading books
- Screencasts or videos of their active reading
- Virtual tours of historical places
- Infographics to explain concepts
- Screencasts of peer editing to support the writing process
- Screencasts of their problem solving for math
- Book Creator lab reports that include photos, video, and audio
- Book trailers for reading books
