EdReady  MATH PATHWAYS FOR COLLEGE AND CAREER READINESS

It’s a common story: A person sets out in pursuit of a degree or job track only to hit an immediate roadblock — their current math skills don’t measure up to the requirements of a particular program of study or vocation. That’s why we developed EdReady math pathways — 152 goals aligned to the most common career and certificate programs in the United States.

EdReady, a personalized learning system, helps students gain the math readiness required by their degree or job aspirations, providing a concise study path unique to their goals.

HERE’S HOW IT WORKS:

Goals
Math readiness requirements for the full range of pathway degrees and certifications are pre-loaded in EdReady. You can customize each pathway to match the program of study offered by your institution.

Knowledge Inventories
Customize each diagnostic to assess student math readiness and support programmatic needs for each pathway degree or certificate.

Resources
A personalized study path with topic-specific, media-rich learning resources will guide your students toward their goals. You can choose which curated resources your students will see.

Readiness
As students meet or exceed their target scores, you can direct them toward additional steps they may take on their journey to academic and personal success.

Data Access
You can set permissions for live student data dashboards and downloads for teachers, administrators, and counselors.

Accelerating a student’s journey to degree or certificate completion is key to academic and life success — that’s why we created EdReady.
AS A COMMUNITY-GUIDED, NON-PROFIT ORGANIZATION,
NROC collaborates with educators to build content and tools that address the needs of the institutions we serve. NROC members and staff conducted a national survey of career and certificate programs, resulting in curricula-aligned, adaptable math readiness pathways. From self-directed placement and review, to co-requisite and multiple measures initiatives, EdReady pathways have limitless applications.

When your institution joins NROC, you receive access to a customized EdReady site with robust reporting capabilities. To learn more, contact us at membership@NROC.org.

It’s not a product you buy, it’s a movement you join.
