App Selection Criteria

Remembering Criteria: Apps that fit into the “remembering” stage improve the user’s ability to define terms, clearly state facts, and recall and locate information. Many educational apps fall into the “remembering” phase of learning. They ask users to select an answer out of a line-up, find matches, and sequence content or input answers.

Understanding Criteria: Apps that fit into this “understanding” stage provide opportunities for students to explain ideas or concepts. Understanding apps step away from the selection of a “right” answer and introduce a more open-ended format for students to summarise content and translate meaning.

Applying Criteria: Apps that fit into the applying stage provide opportunities for students to demonstrate their ability to implement learned procedures and methods. They also highlight the ability to apply concepts in unfamiliar circumstances.

Applying Criteria: Apps that fit into the “analysing” stage improve the user’s ability to acknowledge Kathy Schrock on her website, Anderson’s (2001) adaption of Bloom (1956). The idea to Sharon Artley and was an adaption of Kathwohl and website. This Taxonomy wheel, without the apps, was first translated meaning.

App Selection Criteria

25 languages are planned for 2016. For the latest languages see, bit.ly/languageproject.

Standing on the Shoulders of Giants

This Taxonomy wheel, without the apps, was first discovered at Paul Hopkins’s educational consultancy website: www.paulhopkins.com. That was produced by Sharon Artley and was an adaption of Kathwohl and Anderson’s (2001) adaptation of Bloom (1956). The idea to further it was for the PAD v2.0 and V3.0. I wanted to acknowledge Kathy Schrock on her website: Bloom’s Apps. In v4.0 the App Selection Criteria is based on an excellent 4-pad app of Edutopia by Diane Darrow. V5.0 of the Padagogy Wheel has a comprehensive list of Action Verbs which are from the infographics “Bloom’s Digital Taxonomy Verbs” published by GlobalBadgescitizen.org, first viewed at “Bloom’s Digital Taxonomy Verbs for 21St Century Students” on the Teachthought blog.

Acknowledgement and Thank You

Team Mexico for the Android V5. Collegues from Centro Regional de Formación Docente e Investigación Educativa del Estado de Sonora and the Instituto Tecnológico de Sonora.

Please visit the CRFIEIS website for more resources in Spanish

For the best use of the Padagogy Wheel Model please visit the TeachThought Blog Post: “The Padagogy Wheel – It’s Not About The Apps, It’s About The Pedagogy” bit.ly/aboutpedagogy
