How to Use Plickers

Get the App!
- Go to plickers.com to download the app on your device - be sure it has a functioning camera.

Create an Account!
- Go on the website and create a teacher account

Put in Your Classes!
- Choose the tab labeled “classes” at the top of the page and type in your class roster. It will automatically assign all your students to an individual plicker. (You can add additional classes and students later)

Print a Set of Plickers!
- Choose the tab on the website labeled “cards” to print out the student plickers.
  - It is strongly suggest that you print the cards on cardstock so that they are more durable.
  - Laminating the plickers is not recommended due to glare.

Create Your Questions!
- Choose the “library” tab to create questions.
  - Responses can be either in multiple choice or true/false format.
  - Select the correct response(s) for each question.
  - Click the tab labeled add to plan below each question to attach it to the appropriate class you have already created.

Give an Assessment!
- Log into your plickers account on your computer connected to a smart board or projector.
  - Select the “live view” tab to display the question and answer choices for the students.
    - You can display the question fullscreen
    - You can also hide or show the response panel.
  - Questions are “thrown” to the screen from your mobile device
  - As students hold up their plickers, simply click the “scan” tab and then sweep your phone around the room.
    - As student responses are recorded, you will see who has answered on the panel on the screen (you can choose whether or not to reveal answers)
    - You can also display a graph showing how students answered
