Capstone Presentation: Speed Data’ing

Most education leaders value data analysis but rarely use it. Why is there a disconnect?

WHAT IS THIS SESSION ALL ABOUT?
In this session, three SDP Fellows address how the transaction costs of preparing, accessing, and connecting data contribute to that disconnect by reducing the productivity of data resources. David Hersh, Senior Director of Strategic Analytics at Camden City Public Schools, will share how to reduce the transaction cost of making connections between disparate data points. Alex Spurrier, Research Analyst at Kentucky Department of Education, will share how to reduce the transaction cost of preparing data for use. Ryan Wilson, Director of Data and Assessment at Kettle Moraine School District, will share how to reduce the transaction cost of accessing and analyzing data.

WHAT WILL I LEARN IN THIS SESSION?
In this session you will learn three different strategies to reduce the transaction costs of using data, as well as some lessons from implementing those strategies in practice.

WHO SHOULD ATTEND THIS SESSION?
This session is open to all who are interested, but will be particularly relevant for analyst-type individuals who can implement some of these strategies and leaders of analysts or analyst teams who can work these strategies into systems.

HOW SHOULD I PREPARE FOR THIS SESSION?
Before this session, take a few moments to think about the real “pain points” in your organization around the use of data.
