ORCID

Stands for Open Researcher and Contributor ID
About ORCID

• Open, non-profit
• A registry of unique researcher identifiers
• A method of linking research activities and outputs to these identifiers
• Distinguishes a researcher from other researchers
• Integrates into key research workflows such as:
  • manuscript
  • grant submission
Why ORCID

• The focus of the ORCID initiative is solving the name ambiguity problem.
• Searching in PubMed for lee j [author] retrieves over 55056 records.
• Of the more than 6 million authors in a major journal citations and abstracts database, more than two-thirds of them share a last name and single initial with another author.
• A researcher’s name isn’t enough to reliably identify the author of, or contributor to, an article published in a journal or a dataset uploaded to a repository.
ORCID IN PRACTICE

• ORCID is being adopted worldwide by:
  - publishers
  - research societies
  - universities & research institutions
  - repositories such as Deep Blue
  - funding agencies

• Over 700,000 ORCIDs have been issued since the launch in October, 2012.

• ORCID content is in English, Spanish, French, Chinese, Korean, Portuguese, Japanese, and Russian.

IMPORT FUNDING

ORCID has been working with many member organizations to make it easy to connect your ORCID iD, and import information from their records. Choose one of the imports wizards to get started.

ÜberWizard for ORCID

Import your awarded grants from funders around the world - all in one easy-to-use wizard provided by ÜberResearch. The integrated and continuously-updated ÜberResearch grant data includes grants from funding organizations worldwide such as the NIH and NSF in the United States, the UK Research Councils and Wellcome Trust in the UK, the Austrian Research Council, and over fifty others. Add your grants to your ORCID record with a few simple clicks from the ÜberWizard for ORCID and simplify your data life!

Don't see what you are looking for? You can connect your ORCID iD to many other organizations and sites. See our Member Integration Page to find more connections.
• ORCID is working on making it possible for users to assign the management of their profile to a delegate.
• The delegate will have to have an ORCID.
Some Funding Agencies Adopting ORCID
About the addition of ORCID numbers to E-Link

OSTI has modified the E-Link processing system and Announcement Notices (AN) to allow DOE sites to include researchers' ORCID numbers in their submitted records. The ORCID number will become part of the author information available to users for search and retrieval in DOE databases such as SciTech Connect. The number will also travel with the author’s name to products managed by OSTI such as Science.gov, World Wide Science.org, and the ETDEWEB.

If you are a grantee, you may include your ORCID number as you fill out AN 241.3. The author section of the Announcement Notice asks for your last name, your first name, and your middle name or initial. Then, add your email address, your ORCID number, and your affiliation in the remaining author fields. If the ORCID number you enter is not in the correct format (0000-0000-0000-0000), the Announcement Notice will not allow you to use the “Submit” button. You will receive an error message instead so that you can re-enter the number correctly.

If you are a DOE employee or contractor at a DOE site or Office, you should ensure that your ORCID number is given to the STI Manager or Technical Information Officer for your organization. He or she will put it into the site database that provides records to OSTI. That will allow your site to include your ORCID number whenever it submits to OSTI any scientific and technical information which you have authored or co-authored.

For questions about ORCID numbers and how they are handled at OSTI, you may call Jannean Elliott at 865-576-6784 (elliottj@osti.gov).
• Enables researchers to easily maintain and generate biosketches for federal grant applications and progress reports.
• Provides a convenient portal to ORCID allowing users to generate and associate a unique international ID with the information in their SciENcv.
ORCID ID

The Wellcome Trust has been a supporter of ORCID since its inception, recognizing the key role that ORCID could play in reducing the administrative burden and inefficiencies in job and grant application, and research activity reporting systems.

An existing user of the Wellcome Trusts online application system eGrants, can verify their existing ORCID via the ‘Your Details’ page of their eGrants account.
ORCID and Publishers
• Elsevier is a founding sponsor and launch partner of ORCID.
• Linking to and synchronize ORCID identifier record data with external systems including Scopus.
• Researchers are able to link to their Scopus Author Profiles from their ORCID records, saving them time when setting up their ORCID profile and allowing Scopus to automatically keep their ORCID bibliography up to date.
• Scopus incorporates ORCID data into the Scopus author profiling process to increase the accuracy of the Scopus profiles and automatically propagate work that researchers do to clean up their ORCID profiles.

Nature Publishing Group (NPG) launches partnership with the ORCID (Open Researcher and Contributor ID) registry. 

http://www.nature.com/press_releases/orcid.html
“...nature.com registrants will be able to link ORCID identifiers to their nature.com profile, and authors will be able to link their ORCID identifiers to their manuscript submissions. NPG will also be encouraging authors and registrants to register for an ORCID identifier at www.orcid.org.”
• A nonprofit organization that serves as an open forum for the development of international standards and publishes voluntary consensus technical standards for a wide range of materials, products, systems, and services.

• ASTM has author ORCIDs on articles for those who have one.
Databases Incorporating ORCID
The interface between the blood circulation and the neural tissue features unique characteristics that are encompassed by the term 'blood-brain barrier' (BBB). The main functions of this barrier, namely maintenance of brain homeostasis, regulation of influx and efflux transport, and protection from harm, are determined by its specialized multicellular structure. Every constituent cell type makes an indispensable contribution to the BBB's integrity. But if one member of the BBB fails, and as a result the barrier breaks down, there can be dramatic consequences and neuroinflammation and neurodegeneration can occur. In this Review, we highlight recently gained mechanistic insights into the development and maintenance of the BBB. We then discuss how BBB disruption can cause or contribute to neurological disease. Finally, we examine how this knowledge can be used to explore new possibilities for BBB repair.

ORCID: 00000029248684X
• A founding member of the Open Researcher and Contributor ID (ORCID) initiative.
• Can associate an ORCID account with Thomson Reuters ResearchID.
ORCID Implementation @ UM
Implementation

In December, 2012, MLibrary signed a Member License Agreement with ORCID which allows us to:

• create ORCID records,

• deposit to existing ORCID records, and

• use various APIs and the data those APIs can access to perform tasks associated with ORCID iDs.
How the Implementation Will Proceed.

• Assigning ORCID to all faculty and staff who publish either by manual entry or batch mode, and to make the ORCID centrally accessible to systems that need it.

• Allow the University to obtain existing ORCIDs for faculty who have associated the ORCID with a umich.edu email address.

• Allow the University to batch request new ORCIDs for faculty at the University of Michigan.

• The MCommunity Directory contains profiles for all current members of the university community—students, faculty, staff, alumni, and sponsored affiliates—on all three campuses (Ann Arbor, Dearborn, and Flint).

• There are 23 faculty members with the name “L. Lee”... at UM alone.

• By incorporating ORCIDs into Mcommunity, researchers need only remember their uniqname.
Michigan Experts is a searchable database of research expertise across disciplines from several schools/colleges or institutes at the University of Michigan.
Incorporating ORCIDs into M-CV

• M-CV is the Medical School Faculty Curriculum Vitae online system.
• All UM Medical School faculty must have an M-CV.
