Three Types of Muscle Tissue

1. Cardiac
   a. Characteristics
      i. Striated
      ii. Involuntary
   b. Location
      i. In the heart
   c. Function
      i. Pumps blood through circulatory system

2. Smooth
   a. Characteristics
      i. Smooth
      ii. Involuntary
   b. Locations
      i. Stomach
      ii. Intestinal walls
      iii. Arteries
   c. Function
      i. Expels urine from your urinary bladder
      ii. Moves your breakfast along through your gastrointestinal tract
      iii. Regulates the flow of blood in the arteries and air through the lungs
      iv. Sends babies out into the world from the uterus

3. Skeletal
   a. Characteristics
      i. Striated
      ii. Voluntary
   b. Location
      i. Around bones and other muscles
   c. Function
      i. Aids in the overall movement of your body
      ii. Contracts and extends when your rain tells them to
Homework Menu for Lesson On
3 Types of Muscle Tissue

1. Make a Venn diagram. Use color coding. This can be digital or poster.
2. Illustrate the types using a figure of the human body. Include all details. Submit as digital or poster.
3. Create a Power Point presentation that illustrates and explains each type. Use audio to narrate and submit electronically.
4. Create a cartoon that illustrates each type and makes it memorable. Submit on paper or digitally.
5. Create a meme that makes one type of muscle tissue memorable. Submit digitally.
6. Using the timings feature on Power Point, create flash cards that test the information. Submit electronically.
7. Using material found on Pinterest, make a 10 page booklet that illustrates the three types in various ways.
8. Using video, teach this lesson in a way that would be effective in helping fellow students learn and remember the material.
9. Write a song that teaches all 3 types. You must include 3 facts per type. You may perform it in class or record it. You may choose one other person to participate.
10. Write a story in which each muscle type is a character. Illustrate their differences and show the role that they play in survival.
11. Create a metaphor for each muscle type. For example, smooth tissue is like .... Illustrate with pictures. Present this as a poster or a Power Point.
12. Write an essay comparing and contrasting the three types of muscle tissue. All facts must be included. Do not turn the facts into paragraphs. Use sentences to compare and contrast, using words such as “on the other hand” and “similarly”.
13. Find more information on this topic. The material must not be included in the text or have been presented by the instructor. This information should be meaningful and helpful in understanding or remembering the material. Present this in a poster or digital format.
