How to Play
How to Play a Breakout EDU Game?

1. Look around for clues and artifacts that will help provide information needed to figure out the combinations to the locks.

2. Talk with your group and share what you’re thinking about the clues. You might need to think outside the box in order to break into it.

3. Test out what you think you know! Try the combinations you think will open up the box. If you’re wrong, think some more and try again.

4. Remove all the locks from the Breakout EDU kit before the timer runs out to complete the game.
