Rice University STEM Certified
Discovery Education Presenter Certified
Aldine ISD
Why is Discovery Education a vital connection between the classroom and virtual learning?

- Discovery Education is a dynamic tool that allows the student to virtually explore the dynamics of education and become actively engaged in the learning process. Discovery Education offers an alternative route for teachers to reach every sub population, plan lessons, integrate technology and cross curriculum and increase academic awareness as well as increase scores on Standardized Test.
What is virtual learning?
Virtual Learning in Discovery Education

Active Engagement!!!!!!Lets Move

SOS Activity:

The objective of this activity is for you (the participant) to write on a sheet of paper what are your thoughts of virtual learning after watching the video and what do you want for your students when using discovery education and virtual learning. After two minutes I will say Snowball Fight and you will throw your paper at each other and open up their snowball and critique or add to and we will do three times.
Think Pair Share (KAGGAN Activity)

- Please gather in your core subjects and discuss your learning experience but you have to put your discussion in picture form. You will be given three minutes to design your learning experience on the anchor chart paper.

Expert Out!!
