Your Second Graders Did What!?: A Google Site Research Project
Stephanie Draayer & Kayla Hartman

About:
Times are changing, and so are the ways we can share student writing. Come learn about how a classroom teacher and technology integrationist collaborated to create Google Sites with second grade students as a final project for a writing unit. Students used Google Classroom while researching, Google Sites for their website platform, and Google Drawings to create linked buttons on their homepage. In our session, resources will be provided to help you recreate this experience with your students.
