Open Your Hearts, Minds, and Doors to Collaboration!

A Panel Session with School Librarians
Why are we here?
Meet our panelists!
Panel Questions
If you have had a successful partnership or collaborative project with another type of library/librarian, tell us what it looked like.
What do you see as the best opportunity (or opportunities) for collaboration with another type of library?
What are potential barriers to successful collaboration between library types?

How can those barriers be overcome?
How can you go about establishing a connection with librarians from other library types?

How would you want librarians from other library types to connect with you if they’re interested in partnering?
As a school librarian, what is the most important thing you’d want attendees from other library types to know moving forward?
Thanks for coming…
Let’s keep the conversation going!
