The Roaring 2020’s
UAC2018 – May 26, 2018
With
SHELLEY ACKERMAN

Beginning with the Eclipses of 2019 & 2020, and the Capricorn Steliums of 2020, the planetary activity of this decade will correlate to and manifest as some of the most dramatic activity that Planet Earth has ever seen, heard and felt.

Saturn/Pluto in Capricorn is at the very least, “groundbreaking”. 
The Year 2020 will feature not only the GREAT Conjunction of Jupiter & Saturn (at 0 Aquarius) on the Winter Solstice, but the conjoining of Jupiter/Pluto & Saturn/Pluto as well, all within at degrees of one another in 22-24 CAPRICORN, with the asteroid CERES closely conjoined, and it is an election year. Suffice it to say, we are in unchartered territory.
The Inauguration Chart of Jan 20, 2021
Has the Sun at exactly the degree of the Jupiter/Saturn Conjunction in Aquarius.
Does this symbolize a new era? Or might it take at least another two to three years for Pluto to arrive and stay in Aquarius for those shifts to take place?

Pluto in Aquarius =
Power to the People.
Three Pluto ingresses in Aquarius
March 23, 2023
January 20, 2024
And
November 19, 2024.
Although Pluto was in Capricorn on July 4, 1776
The better part of the American Revolutionary War took place with Pluto in Aquarius.
The USA will experience THREE Pluto-Returns in 2022:
on February 20, July 1, and December 28.
How this plays out will depend on what happens during the next four years as Pluto completes his last 10 degrees in Capricorn.
