PSYCHOPHYSICAL ASTROLOGY:
Dr. Hamer´s theory applied to astrological solar arc directions

"Every disease is a biological solution to an unconscious, unresolved emotional conflict. Discovering, understanding and making conscious the secret code of the symptom stops the disease until its total remission."

EMOTIONS

• We cannot prevent or avoid many of our emotions. Instead, we can decide what to do with them. Above all, we have the ability to prevent emotions from affecting our health. The aim of psychophysical astrology is to go into our center, integrating the physical, mental, emotional, and spiritual levels, in order to guide the channeling of energies acting on our delicate bodies and prevent the onset of disease. If the trauma has already acted on the physical level with the appearance of the symptom, the astrologer can lead us to discover the origin of that symptom, guide us in the healing of the present moment, and prevent the symptom from reappearing.
THE ELEMENTS AND THE HUMORS

• Hippocrates and the theory of humors applied to the human body.

• According to him, the components of the macrocosm (world) correlated with the microcosm (body)

• Galen, meanwhile, famous doctor of the year 131 a.C. called "Primordial Principles" to the elements; qualification that is currently used by Ruediger Dahlke, author of the renowned book -among others- "Illness as a way".

MODERN DOCTORS AND NEUROSCIENCE

• Dr. Ryke Geerd Hamer. German Physician. Originator of the GERMAN NEW MEDICINE.

• Dr. Ruediger Dahlke. German doctor and psychotherapist, is an expert in the field of esoterism and psychosomatics. He is one of the so-called therapists of reincarnation.

• Dr. Rogelio D´Ovidio. (Buenos Aires, Argentine). Dr. D´Ovidio is a physician who practices medicine with a holistic approach since 1989. Based in the “Seven Bodies” (Physical; Emotional; Mental; Intuitional; Spiritual; Monadic and Divine).

• Dr. Adriana Schnake. (Chile). Psychiatrist at the University of Chile. Director of “Centro de Crecimiento y Desarrollo Anchimalén”

• Among many others…
THEIR VISION:

• All of them had the vision to integrate the emotional, mental and physical aspects of the human being to make a complete reading of the traumatic impact as trigger of the disease.

• The level of tolerance to the frustration that each individual has, defines, in an incredibly high percentage, the immunity response that he will have facing the disease and this level depends on his psychic apparatus, his physical constitution and his emotional balance.
THE SUBCONSCIOUS IS THE ONE WHO DECIDES WHICH ORGAN OR WHICH FUNCTION WILL BE AFFECTED AT THE MOMENT OF THE TRAUMA.

THIS RESPONSE DEPENDS ON THE SUBJECTIVE (PERSONAL AND SINGULAR) PERCEPTION OF REALITY THAT PERSON HAS.
In Germany, Dr. Ryke Geerd Hamer came to a similar conclusion to that of Hippocrates in the twentieth century, after more than 40,000 cases studied relating emotional impact to physical symptoms.

His research proves categorically that the existence of an emotional conflict precedes the onset of the disease. According to his view, in cases of serious diseases the appearance of the symptom occurs between one and three years after the impact occurred in a surprising way.
Dr. Hamer’s Vision

- Dr. Hamer began his cancer research work in the wake of the tragic death of his son who was killed in 1978. Soon after the death of his son, Dr. Hamer is diagnosed with testicular cancer and survives the same. This traumatic situation took him to investigate cancer cases, analyzing each patient's scan or brain scan and comparing it with personal history to determine if an acute emotional trauma preceded the onset of cancer.

- After studying approximately 10,000 cases, Dr. HGamer was able to establish that each disease is provoked and manifested due to the impact of an unexpected emotional conflict or a traumatic event for which we are not prepared or take us completely unprepared.

1 to 3 years after trauma
• According to Dr. Lipton and the latest discoveries of Cellular Biology, the cells adapt their structure and their behaviour dynamically in order to create the singular perception of the ambit that surrounds them.

• Each cell is inherently:
  - Intelligent
  - Independent

• Each cell adjusts its biology to its own perception of the environment.
• In the human body, the action of the set of cells that perceive and receive those stimuli, is completed through the nervous system that perceives and reacts to the environment with the only goal of survival.

PSYCHOPHYSICAL ASTROLOGY

• The planets are the psychic functions
• The signs show the qualities of these functions
• The houses are the areas where they will be unleashed within the physical world
ASTROLOGERS ARE NOT DOCTORS !!!

ITS FUNCTION IS NOT AIMED AT DIAGNOSIS AND THERAPEUTIC FOCUSED ON THE PHYSICAL SYMPTOM.

THE ASTROLOGER WHO IS NOT TRAINED IN MEDICINE CANNOT MAKE A DIAGNOSIS OF DISEASE, AND MUCH LESS PRESCRIBE A MEDICATION OR ANY TREATMENT.
ASTROLOGERS ARE INTERPRETERS OF A SYMBOLIC LANGUAGE

ASTROLOGERS ARE DECODERS OF A DIVINE COSMIC LANGUAGE THAT CAN GUIDE THE PERSON AND CONTRIBUTE TO THEIR BETTER SELF-KNOWLEDGE.

THEY STUDY THE POSITIONS AND MOTIONS OF CELESTIAL BODIES IN THE BELIEF THAT THEY HAVE AN INFLUENCE ON THE COURSE OF NATURAL EARTHLY OCCURRENCES AND HUMAN AFFAIRS.
ASTROLOGICAL COUNSELING

• As astrological consultants operating in the field of health, we believe that the healing process can be achieved by offering the client a threat-free environment that allows him to delve into the three aspects of the disease. The role of the astrologer we propose from the Psychophysical Astrology is to accompany the client in a process that facilitates the awareness, to solve the conflict in a non-traumatic way operating from his emotional level.
HOW IS AN EMOTION PREVENTED?

• We can not.

• An emotion emerges, makes its appearance at the conscious level and is triggered by the amygdala, the primitive brain.

• Therefore, we can not help feeling the emotion. Nor can we be responsible for the emotion itself.

• But we must take responsibility to decide what to do with it ...
The cerebral hypothalamus is also connected to the sympathetic and parasympathetic nervous system through the spinal cord. Both are ruled by Uranus and have under their control more than 72,000 nerves throughout the body. From the physiological point of view, stress emanates from the sympathetic and parasympathetic nervous systems. The adrenal glands are responsible for secreting adrenaline and cortisone, under the regencies of Mars and Venus respectively.

Hypothalamus: Chemical messages. Regulates the functions of the physical body (feeding, excretion, sexual function, etc.)

Pituitary | Pineal: A secondary impact will activate the pituitary gland that is in charge of controlling the growth and general involution of the organism. Jupiter | Saturn.

Both the hypothalamus and the pituitary gland are connected in turn with the pineal gland, ruled by Neptune.
RETURNING TO THE CONCEPT OF DR. HAMER...

...when a traumatic conflict produces a significant emotional impact, the body - through the whole system described in the previous slide - triggers a stimulus that will impact a specific organ or function in the body. This impact is also printed in advance on a determined area of the brain. It will be this organ / function that will later show the symptom. Within 1 to 3 years from the trauma.
ANY CONFLICT NOT EXTERNALIZED OR CONFRONTED ANCHORS IN THE BODY AND PRODUCES PAIN

• When the perception of the environment is inadequate, partial or distorted, then we become ill.

• Hence, we are not controlled by our genes but by our beliefs that are -in short- our own perceptions. These were forged in early parental conditioning and through accumulated experiences.

• All this determines who we are. The determining factor is not only what happened, but rather how we perceive the trauma.
ANY CONFLICT NOT EXTERNALIZED OR CONFRONTED ANCHORS IN THE BODY AND PRODUCES PAIN

• That is to say, in astrological terms:

❖ We need to look to those positions in the charts that favor the outlet and expression of any negative emotion.

❖ Also to the 2nd. House, Chiron and Saturn in order to study the level of resilience of the individual.

❖ And there are two Houses extremely important: the 8th House (depurative processes) and the 9th House (commandments, beliefs and faith frames).
INCORPORATING THE ASTROLOGICAL LOOK

More important than describing a symptom is to understand and determine the cause of a disease. It is possible to preserve the body and the collapse of the system, if the situation of impact over time is understood and if it can be assimilated.
• Taking as a guide the development of Dr. Hamer, we look for in our archives the cases of people who developed a disease and we try to relate the moment of the diagnosis with the moment of some emotional event of high psychophysical impact, within the previous 1 to 3 critical years. That's where we can observe how the body records the impact of the situation.
THE IMPORTANCE OF THE ASCENDANT AND ITS RULER

• The Ascendant represents:
  ✓ Our physical constitution.
  ✓ Our physical body.
  ✓ Our vitality.

• The position and the cosmic state of the ruler of the ascendant will denote the ability of the organism to respond to traumatic situations that could become into illness.
INVOLVED HOUSES

• Historically when we speak of medical astrology, the houses that were considered were Houses 6, 8 and 12, placing in them the acute diseases and vulnerable zones (House 6); chronic diseases (House 12) and short, rapid and abrupt diseases related to depurative processes (House 8).

• Let's expand this focus and include other Houses or areas that support health, both physically, emotionally, mentally and spiritually.
2ND. HOUSE AND 11TH HOUSE

• Houses 2 and 11 are decisive when interpreting the strength of the constitutive psychic apparatus through self-esteem and self-esteem (2nd. House), a condition that will lead us to evaluate how the person will be able to face any situation that entails frustration, stress, humiliation, disqualification and physical and psychological risk, connotation that will be given by the 11th. House.

• 11th. House: In this House we see the longings, goals and projects that -if not satisfied- will appeal to the resources of the 2nd. House (self-esteem and scale of values) so that this negative situation does not generate a potential emotional trauma that triggers illness.
THE ALL IMPORTANT 8TH. HOUSE: DEPURATIVE PROCESSES OR HOW I GET RID OF THE TRAUMA

- Represents the depurative processes of the organism and the psyche. In women, it represents her menstrual activity and in men, ejaculation.

- In both sexes, it represents bowel movement, urination, sweating, crying, sneezing, coughing, screaming; sphincter control processes.

- Psychic processes of self-control and repression; everything that is experienced as loss and death; the set of mental and emotional states that constitute the shadow; the sexual drives; the strategies performed by the Self in order to control and possess the other.
The All Important 8th. House: Depurative Processes or How I Get Rid of the Trauma

- This House represents everything that is repressed, controlled, or, on the contrary, lost. When a planet transits through this House, the material of meanings contained in it is activated. Crises constitute depurative opportunities by means of which the ego is freed from psychic and physical toxins, increasing its energetic potential.
ELEMENTS IN THE 8TH. HOUSE

- **FIRE**: the eliminatory and depurative function has a lot of energy, which ensures an efficient health and a tendency to short-term illnesses.

- **EARTH**: the depurative function has a naturally slow rhythm depending to a great extent on the nervous system.

- **AIR**: the depurative functions depend to a great extent on the aerobic capacity of the person and should avoid the sedentary life.

- **WATER**: the depurative function will be subject to cyclic processes that will alternate stages of activity with others of inertia.
SOLAR ARC DIRECTIONS

$1^\circ = 1$ YEAR
• Solar Arc Directions is a symbolic method that advances the entire chart at the rate of 1 degree equal to 1 year.

• They can also be advanced according to the average diurnal movement of the Sun (Naibod Arc) which is $59'07''$ as an increment to progress the age of the person.

• The calculation of these Directions is very simple and can be done with the naked eye, which contributes to its widespread use.

• The directions are a reflection of external situations that will impact the person to open their consciousness to the necessary change for that evolutionary instance. Not only will he be involved by external events that he may not have caused; they have a strong sense of destiny marked from birth.

• IN 2003/2004 HE WAS DIAGNOSED WITH LIVER AND PANCREAS CANCER RESPECTIVELY. BOTH ORGANS RELATED TO VENUS AND JUPITER. THE PERSON WAS CONFRONTED 3 TIMES DURING THE 2 YEARS PRIOR TO THE DIAGNOSIS, WITH REPEATED HOSTILE SITUATIONS ON THE PART OF HIS TWO BROTHERS AND HIS BOSS, UNABLE TO ASSERT HIS OWN ABILITY TO DECIDE ABOUT HIS LIFE.

CASE OF STUDY 2

- At age 21, her mother dies after developing a duodenum cancer, after a long and deep crisis with her husband (51 years of marriage. She never divorced; instead she got depressed.

- In 2001 (at 43 years old), the client was diagnosed with a possible carcinogenic formation in the uterus, which led to a subsequent hysterectomy. She had 15 years of marriage, and was facing a deep crisis. At one point she knew that she was repeating her mother's story.

- When the symptom arose and she faced the diagnosis, she managed become aware of the message of her body.

I finally had to ask myself whether our understanding and our concept of disease had not been entirely wrong because of our ignorance of the biological purpose of disease.
