I thought I was well on my way toward becoming a successful consulting astrologer...
At least until my six-year-old daughter stepped in.

I got serious about unlocking the connections between planetary cycles and trends in the markets.
In 1987 I began publishing FinancialCyclesWeekly newsletter. In 2001, during a long period of hospitalization, I discovered an astro-trading technique that worked to get consistent ROIs that out-performed the major market averages.

My personal mission in my life and work is to remove the obstacles that get in the way of people who are trying to reach bigger goals, personally or professionally, in or out of the markets.
Along the way, I seek to use financial astrology as a spiritual discipline to create conversations about the evolution of global consciousness.

In building bridges between the personal, the spiritual, & planetary evolution, we can find a powerful nexus point in astro-trading.
Astro-Trading offers constant opportunities for deep self-understanding. It's like psychological brain surgery.

You can also lose money.
Because astro-trading has worked in the past doesn't mean it will ever work again. But it has done pretty well for the past 16 years....

So let's keep it simple:

How Do We Identify Profitable Opportunities For Astro-Trading?
TRADING includes both buying & selling.

TRADING vs. INVESTING
Is it a long-term commitment... or a short-term proposition?
Investors buy stocks and hold them for months or years.

We've found that short-term swing trading provides a big advantage by being flexible and allowing us to recycle trading capital.

We are typically in market positions for just 7 or 8 trading days.

To be successful in trading, we have to pay attention to three critical factors:
In understanding the market environment, we are mostly concerned with trends.

“THE TREND IS YOUR FRIEND”
Many new traders stop their trend analysis at this point.

But there's a third kind of trend in the markets that shouldn't be overlooked.
To trade any market successfully, it's important to have an understanding of (or at least an opinion about) the current trend.
Long-term planetary cycles can help us understand longer-term market trends more effectively.

Saturn Declination Cycles & the London Stock Exchange - 1900-2020
But the opportunities for making the most money come when the trends change, and the market starts to turn.
Turns create special trading opportunities, especially if we can identify them in advance.
We don't use astrology in a vacuum. We add the astro-trading advantage to our trading toolbox.

When we look at potential astro-trading connections, we do meticulous back-testing of the historic market responses to planetary phenomena.
When something has never worked before, it's not likely to start working suddenly now.

When we back-test, we can determine the percentage of likelihood of trading success.
We can also plan in advance for losing money in our trades.

“Traders who lose think about how much they can win. Traders who win think about how much they can lose.”
Using Stop-Loss Orders

“Doubt or unbelief is as certain to start a movement away from you as faith and purpose are to start one toward you. It is by not understanding this that most people who try to make use of 'mental science' in getting rich make their failure. Every hour and moment you spend in giving heed to doubts and fears, every hour you spend in worry, every hour in which your soul is possessed by unbelief, sets a current away from you in the whole domain of intelligent Substance.”
Stop-Loss Orders are not about doubt and unbelief. They are about deciding how LITTLE we are prepared to lose as we move forward toward success!

**TYPES OF TRADING TURNS**

KEY TRANSITING FACTORS

JUPITER
SATURN
MARS
Remember that Jupiter transits can mark trading highs (which can be bearish), while Saturn transits can mark trading lows (which can be bullish).

Solar Eclipses are also important transiting factors to radix horoscopes in market forecasting to identify trading opportunities.
The BitCoin crypto-currency has been the subject of much debate since its inception, with true believers hanging on persistently in the face of relentless challenges, including a rapid expansion of other crypto-currency alternatives in the past couple of years. For many investors in BitCoin the returns have been huge, however, and the solar eclipse triggers suggest that even greater speculative heights are possible, with the Uranus/Poseidon midpoint providing the excitement and the Aries/Ascendant midpoint signaling a global impact. This is definitely a market to watch, along with other crypto-currencies as well.

In our astro-trading analysis, we need to be cautious about symbolism, and we need to connect more consciously with planetary resonance.

This is where we have a big advantage as astrologers!

Know your own chart – but it's best to consult with a skilled financial astrologer.
SKILLED FINANCIAL ASTROLOGER

- TESTED & CERTIFIED IN ASTROLOGY
- YEARS OF EXPERIENCE
- KNOWLEDGE OF BROAD ECONOMIC ISSUES
- PERSONAL TRADING EXPERIENCE
- ACTIVE IN RESEARCH & PUBLICATION
- COMMITTED TO PERSONAL CONNECTION
- CHARGES SUBSTANTIAL FEES

But the real question is, what will YOU do?
The reason we do the analysis, & the reason we back-test market data, is to create the CONFIDENCE we need to take action!

But there's a sad reality. Even when I provide expert guidance to traders based on their natal charts, many of them fail to follow through.
They need extra coaching, and also a good bit of hand-holding, to avoid falling into old patterns of behavior.

That's why it's important to work with a high-priced astrologer. If you pay $1,500 or $2,000 for a consultation, you're much more likely to pay attention and follow through!
If we can connect all three parts of the Trading Triad, we have a much greater probability of success in astro-trading.

The equities markets are a never-ending stream of opportunity.
We also have new opportunities emerging in the dynamic times ahead!

By applying key astro-trading principles, we have some big financial opportunities.

More importantly, we also have an opportunity to create a new economic paradigm, and to become co-creators of a new transcendent reality.
Here's a tidbit from the book (page 113):
A BULLISH BITCOIN CYCLE

The Sun transiting from 04° Gemini to 23° Gemini

This transit has bought Bitcoin prices higher 85.7% of the time.

The median gain has been 8.7%; the mean gain 27.2%.
